

Quality Assurance Engineer

Location: Los Angeles, CA

To apply please send your resume, with the **email subject of Ops 2006**, to careers@telescope.tv

Job Description

The ideal candidate is a quick learner who takes pride in what they do and someone who will be able to contribute to a diverse group of projects. The QA Engineer will work as part of a team to design, develop, test, and support a growing number of exciting projects and products for a wide range of clients specifically on web and mobile based user interfaces.

Skills & Requirements

Minimum Qualifications

- 1 year + of quality assurance experience in the software industry
- Performing basic to intermediate manual black box testing
- Working knowledge of one scripting language
- Some understanding of relevant technologies: HTML, JavaScript, CSS, SQL, TCP/IP, HTTP, XML, JSON
- Ability to work in a Linux/BSD environment
- Excellent communication, organization and relationship management skills
- Organized, self-motivated, detail-oriented, and decisive
- Knowledgeable with Android and iOS systems
- Ability to execute under accelerated timeframes and to quickly adapt to changes
- JIRA, Selenium experience is a plus
- Most importantly, motivation to learn, grow, and acquire new skills!

Responsibilities

- Execute test plans, scenarios, scripts, and procedures
- Run manual unit, regression, and load tests and procedures
- QA user acceptance testing across multiple websites and mobile applications
- Work effectively within a team of QA engineers and developers
- Perform initial debugging procedures by reviewing configuration files, logs, databases, and code to determine breakdown source
- Interact with customer support and marketing teams to identify new features and potential bugs
- Provide feedback and recommendations to developers on software usability and functionality
- Provide technical support during customer testing

Perks

- 16 paid days off per year
- All national holidays paid per year
- Comprehensive medical, dental, vision, life insurance, and 401k (up to 100% of 6%)
- Occasional catered lunch
- Free parking (or stipend depending on location)
- Partially paid cell phone coverage
- Fully stocked kitchen with snacks, drinks, and Starbucks coffee
- Two holiday parties for all employees
- Casual work attire

Current project examples:

- Manually test products and services as much as possible
- Assure correct business logic for voting applications and products, and directly support the world's largest live shows such as: The Voice, American Idol, Dancing with the Stars
- Be constantly involved in support of software usability and functionality of our websites, mobile apps, and in-house applications.

About Telescope

The work environment at Telescope is exciting, engaging, and constantly dynamic. We have major media clients who depend on us year over year to deliver amazing products and support their live TV vote shows. We also have close partnerships with social networks such as: Facebook, Twitter and Instagram to which we deliver fan engagement products.

Telescope Inc. has been responsible for the most successful television and live media participation shows in the last decade: *American Idol*, *The Voice*, *Dancing with the Stars*, *So You Think You Can Dance*, *AMA*, *VMA*. We also work with Coca Cola, NASA, Project Greenlight, and others. We create the software that handles all parts of the voting, and now we are going after social as well. We work with massive scale, big data, and cutting edge technology. Our technical environment is full of passionate employees who enjoy what they do every day.

Telescope Inc. is an equal opportunity employer which does **not** discriminate against: race, color, religion, national origin, age, sex, pregnancy, citizenship, familial status, disability, veterans, or any other protected class.
